# Larkway Product Operations Guide

Status: CURRENT

Updated: 15

## 1. Plan capabilities

- Bulk Upload: Available on Scale and Enterprise. Supported file size is up to 8,000 rows per CSV.
- Starter: Bulk Upload is not included.
- Shipment status: BOOKED means the shipment exists but Larkway has not yet received pickup confirmation from the carrier. PICKED_UP means the carrier has confirmed pickup.

## 2. Current known issues

### KI-314 - Bulk Upload timeouts on large files

Opened: 9 September 2026 Status: Investigating

Some Scale and Enterprise customers see intermittent timeouts on CSV uploads above roughly 2,500 rows, even though the supported limit is still 8,000 rows. Workaround: split the upload into files under 2,500 rows. Single shipment creation is not affected.

### KI-322 - TransVelo pickup confirmation lag

Opened: 14 September 2026 Status: Monitoring

TransVelo pickup confirmation webhooks can arrive up to 35 minutes late. A parcel may already be collected while Larkway still shows BOOKED. Before telling a customer a pickup did not happen, check the carrier's status or wait out the known delay window.

## 3. Resolved issue

### KI-290 - Label printing: Resolved 2 September 2026.

Do not use this resolved issue to explain new incidents unless the evidence specifically matches it.
